

G-POWER® 6series E63 M6 Coupé / E64 M6 Convertible

G-POWER G6 - E63 / E64 / E64 Convertible / M6 – Figures inspiring – 620hp – 4.5 sec/100 - 330km/h (limited)

The current 6series demonstrates as almost expected the particular position of actual BMW models within the international competition. Whether Coupé or Convertible, the driving performances and optical attractions will be held as benchmark also over years. To achieve improvements on this automotive level is a very high demand to the capabilities of a tuner. G-POWER succeeded in an impressive way thanks to reduction to the essential. All this with engines inspiring also in the high-speed area with full stroke, full acceleration – here dreams become reality! G-POWER emphasizes the attractivity of the 6series by an elegant as well as efficient body kit "G6 HIGHLINE". "Fine feathers make fine birds" – our aero conversions make forget every relation to "series".

G-POWER supplies compressor systems for BMW automobiles since 1994 and by the merger with ASA today is one of the leading supercharging specialist.

G-POWER became known by the compressor conversions based on the M-engines in the M3 and MZ3.

Nowadays, the **G-POWER** "Hurricane" features the technically feasible on basis of BMW M6 V10. With 730 hp the "Hurricane" counts to the fastest saloon cars of the world. Though, quality and design of the ASA compressors are on OEM level and offer highest reliability and stability at extreme performance data. **G-POWER** herewith inimitably combines driving performances of exotic sports cars with the comfort features of a BMW saloon car.

More information is available on the internet under www.g-power.de.

Supercharger systems

110.060.035

G-POWER M6 V10 BI-Kompressorsystem EVO I

36000,00 €

Basic: M6 V10 with 507PS (373kW); increased output to 635PS (467kW) torque 600Nm at 7.200U/min consisting of:

Supercharging: 2 x ASA K1-12 superchargers including overrunning clutch; supercharger bypass flow oil supply featuring a water cooled oil pressure reservoir; twin ultra stiff CNC shaped supercharger bracket systems made from aluminium including an extended support-aggregate belt-drive for the superchargers' drive; dynamic, pneumatic controlled, engine related boost control; twin flow optimized, large volumetric fresh air intakes made from carbon fibre; twin racing air filters.

Intercooling: Twin high capacity, aero and body-sonic optimized water cooled intercooler systems using a low temperature circuit consisting of low temperature intercooler (air to water), return intercooler (water to air), cooling liquid storage and separately controlled electrical pump; aluminium coated heat preventing inner hood cover.

Engine modification: 10 x fuel injectors with enlarged mass flow.

Electronics: Custom made software for the standard BMW engine and SMG- transmission electronic control unit (BMW OBD stays completely untouched); enabling in addition an unlimited top speed.

Identity: Set of 5 G-POWER logos; carbon fibre application with G-POWER logo for the engine compartment.

Exhaust system: Backpressure reducing G-POWER performance exhaust system made from stainless steel consisting of flow optimized tubes, racing catalytic converters and a stainless steel rear silencer with four end tips.

Electronics: Custom made software for the standard BMW engine and SMG- transmission electronic control unit (BMW OBD stays completely untouched); enabling in addition an adjusted top speed of 340 km/h.

Identity: Set of 5 G-POWER logos; carbon fibre application with G-POWER logo for the engine compartment.

G-POWER M6 V10 Hurricane standard equipment consisting of:

G-POWER bodykit "Highline": G-POWER front bumper with sporty air intake grid; G-POWER side skirt set; G-POWER rear bumper with exhaust cut-out left / right for G-POWER rear silencer; G-POWER trunk attachment.

G-POWER wheel set "Silverstone Diamond": Front axle 9,5 x 21 ET9 rims with 255/30 ZR 21 tyres incl. mounting kit GP 31; rear axle 10,5 x 21 ET22 rims with 295/25 ZR 21 tyres incl. mounting kit GP 18; tyres from technology partner DUNLOP.

G-POWER adjustable coil-over suspension kit "G5-RS": Four stainless-steel strut units, height and hardness adjustable. Lowering: at the front axle 25 - 60mm, at the rear axle 25 - 60mm.

G-POWER sport brake system "G5-400/6" for the front axle: 2 brake discs / Ø 400/36mm, two 6-piston fixed callipers, silver coloured, steel-flex hose package; one set sport brake linings; mounting set.

G-POWER sport brake system "G5-345/4" for the front axle: 2 brake discs / Ø 345/28mm, two 4-piston fixed callipers, silver coloured, steel-flex hose package; one set sport brake linings; mounting set.

G-POWER Interior: G-POWER steering wheel "Nardo Edition"; G-POWER speedo/ dial conversion to 400km/h; G-POWER carbon fibre interior trim; G-POWER pedals set "GP Racing", aluminium covered; G-POWER footrest "GP Racing", aluminium covered; G-POWER soft velour floor mat set, charcoal-grey coloured.

G-POWER performance kits

Startup - systems

Preis (ohne MWST)

price without

The especially in the house of G-POWER developed engine performance kits consist of a thoroughly to the BMW engines adjusted engine management by motronic adjustment. At the G1 kits, an more efficient sport air filter is additionally installed and at the G1 Plus, is enlarged by a G-POWER stainless-steel rear silencer. The G1 Plus S kit particularly was developed by our engineers for the BMW M-engines.

So that, G-POWER combines maximum output paired with highest stability with the series engine.

G-POWER motronic adjustment means intensive development work of our engineers based on experiences of decades in the field of engine technology.

Our main focus is has all times been lying on a harmonic performance evolvement and absolute every days suitability.

Obviously more road adherence and engine cooling in the high-speed area – and a refreshing design making yourself love to get into - your G-POWER BMW.

HIGHLINE – the new product line from G-POWER® Design. Consequently manufactured in carbon reinforced hybrid fabric for high endurance strength of all G-POWER aero components.

Developed by experienced automobile designers with the aim to deepen the own form language of BMW automobiles, to emphasize it and at the same time to let it become so individual that the life style ambitions will be completely met. With our G-POWER HIGHLINE products your BMW presents himself much more excitingly and sportively without ever being obtrusive.

Our G-POWER- lowering sets – made in Germany – are manufactured according to original G-POWER guidelines in OEM-quality and are particularly developed for the BMW series shock absorbers. By the G-POWER- lowering set a lowering of 30 to 40 mm is reached being arranged in V-form especially for the BMW models. The well-known G-POWER V-shape-lowerings both also unify more sporty driving, good conering and reply to quick steering demands.

A further improvement of the driving dynamic and safety margin is provided by the RS-spring strut suspensions.

More information is available on the internet under www.g-power.de.

G-POWER spring strut suspensions

RS-suspension "G-Setup"

Preis (ohne MWST)

price without
German VAT

RS spring strut suspensions from G-POWER are representing the top of suspension technology. They combine driving comfort with a high-rate and optically attractive lowering. Particularly for customers desiring an extreme lowering of up to 60 mm, a spring strut suspension can be offered due to fewest restrictions in every day use. Special spring struts being produced in small series for G-POWER, are shortened by around 40 mm (depending on car type) and offer a longer remaining spring movement. This is particularly important for driving at high speeds and at the limits since despite the high lowering rate by the modified construction, the safety related remaining spring movement is kept. Additionally, the G-POWER RS spring strut suspension offers beside the individual adjustability at front and rear axle. G-POWER uses especially produced dampers with particularly adjusted characteristic curves suitable for the high lowering rates .

More information is available on the internet under www.g-power.de.

G-POWER brake systems

"Not only performance is important"

Preis (ohne MWST)

price without
German VAT

Particularly at the high speeds being for example generated by a G-POWER EVO III engine with 730 hp in the M5 V10 "Hurricane", also the brake system has to be designed to the increased driving dynamic.

The high-performance G-POWER brake systems are individually developed for each car and intensively tested on the „Nordschleife“ of the Nürburgring. The problem of "fading" (lower brake performance by frequent braking and consequently high temperatures in the brake system) is solved by us with bigger brake discs. These can transfer the temperatures better to the environment. By coordination of special brake callipers, high stressable sport linings and more powerful special brake fluid it provides the highest level of comfortable reliability.

More information is available on the internet under www.g-power.de.

G-POWER "HIGHLINE" sport exhaust systems – DEEPTONE pure! Unique Motor-Sound

For more than 20 years, G-POWER is established in the market and very early recognized trends of the branch and transferred them in time. Today, we sell our exhaust systems throughout the world. G-POWER, well-known as stainless-steel exhaust manufacturer with the „particular sound“ exclusively concentrates onto the BMW area. While developing our „high-end“ silencers, we took the extraordinary optic, full sound as well as a performance plus into consideration.

Our engineers realized their high claim on the proverbial G-POWER sound – Pure DEEPTONE, a pleasure as soon as the key has been turned around; the engine awakes.

G-POWER complete package

For assembly in our house or in case of purchase of several parts, please ask for an offer on a complete package. According to kind of conversion resp. parts, we will submit you a special quotation with package prices.

Please do not hesitate to contact our friendly sales team under:

Phone: 0049 (0)4852 / 54-209 or by e-mail : info@g-power.de

G-POWER mounting calculation

Additional note for assembly of G-POWER products:

The indicated values in the column "assembly time / minutes" are guide values and are defined with 1 hr. corresponding 60 minutes. For assembly one assembly hr. is 60 = 72.00 Euro plus VAT.

Example:

240 (Assembly minutes/column)

----- = 4 hrs. x 72.00 € = assembly price € 288.00 plus VAT
60

G-POWER notes / conditions

The listed assembly times are guide values and can vary. All indications regarding performance are approaching values. Power upgraded gas powered engines have to be operated with min. 98 ROZ / SuperPlus fuel.

Performance indications are depending on car relating details as car type, equipment, empty weight, rear axle ratio, wheel-tyre-combination, gearbox version and aerodynamic equipment of the individual car.

Indications on performance upgrades and/or performance kits are average values.

Inspection based deviations of +/- 5 per cent are possible. Indications on the complete performance by performance upgrade and/or performance kits of modified series engines are based on the factory values in the registration document, which can as such vary by +/- 5 per cent. For lower performances of series engines exceeding that, G-POWER® C-Meo Sportive Parts GmbH will bear no liability.

* Valid in the EC area! According to guarantee conditions of November 2006. The G-POWER® C-Meo Sportive Parts GmbH tuning guarantee conditions are available on our homepage www.g-power.de or contact us directly.

Subject to technical and price changes. With appearance of this price-list, all price are valid as mentioned here. All previous prices will expire. Deliveries and services are carried out exclusively according to our General Terms and Conditions (GTC's).

Subject to changes in price, construction and design as well as errors.

No liability for printing errors. Reprints, also in extracts, only with written allowance of G-POWER Motive Trader GmbH.
